

PROFESSIONAL SUMMARY

Experienced .NET Core, Azure and SharePoint Developer with 10 years of hands-on experience, currently working as a Senior Digital Engineer at Sonata Software Limited, Bangalore with expertise in designing and delivering end-to-end software solutions using .NET Core, Azure, Microservices and SharePoint. Experienced in driving project execution, collaborating with cross-functional teams, and ensuring high-quality deliverables. Seeking opportunities to work on technically challenging projects and explore modern technology stacks.

CORE COMPETENCIES

- Hands-on experience with .NET, SharePoint, system design, design patterns, OOP concepts, SDLC, and agile development processes.
- Led teams, collaborated with stakeholders, and presented product demonstrations with clarity and technical depth.
- Comfortable working across both traditional and modern technologies, with experience in developing, optimizing, and deploying scalable projects.
- Focused on delivering efficient and maintainable code, resolving development issues proactively, and ensuring seamless project execution.

TECHNICAL SKILLS

- **Top skills:** .Net Core, SharePoint, Azure Services, Microservices, SQL Server, PowerApps, Web API, C#, React
- **Secondary skills:** Entity Framework, LINQ, JavaScript, jQuery, HTML, CSS
- **AI Tools:** Cursor, DevinAI, CoPilot
- **Other skills:** Azure DevOps CI/CD, PowerShell, Microsoft Power Platform, Agile Methodologies
- **Tools:** Visual Studio, Visual Studio Code, Postman, ShareGate, SharePoint Designer, Storage Account Explorer, SSMS

AWARDS AND RECOGNITIONS

- Earned client appreciation for effectively resolving critical Microsoft breaking changes impacting Enterprise search.
- Honoured with company-sponsored visits to Sweden twice for outstanding performance and contributions.
- Awarded the “Individual Performance” recognition for exceeding deliverable expectations.
- Received multiple accolades at Wipro, including “MS Dynamos”, “Inspiring Performance”, “Pleasure to Work with You”, “BU Awards-2017” and “You Made a Difference” acknowledging exceptional dedication and impact.

EXPERIENCE

Sonata Software - Litera (April 2025 – Present)

Projects: Webhooks, PeppDMS, PeppSharePoint

- Modernized SharePoint Online solutions by implementing Microsoft Entra ID authentication across enterprise applications, ensuring alignment with Microsoft security standards and deprecation timelines.
- Executed platform modernization initiatives, including .NET framework and NuGet package upgrades, improving application stability and long-term compatibility.
- Designed and developed a custom SharePoint site provisioning framework with secure authentication, automated component provisioning, and consistent UI/UX standards.
- Identified and mitigated Microsoft platform changes impacting enterprise site provisioning by implementing adaptive provisioning strategies, ensuring uninterrupted operations.
- Migrated Remote Event Receivers (RERs) from ACS to Microsoft Entra ID authentication in alignment with Microsoft’s retirement roadmap.
- Investigated and resolved critical SharePoint Online production issues, minimizing business impact and improving platform reliability.
- Remediated P1–P3 security vulnerabilities within defined timelines, strengthening compliance and application security posture.

- Implemented webhook-based architecture for metadata synchronization, reducing dependency on legacy components while improving scalability and reliability.
- Developed and enhanced SPFx extensions to enforce custom UI behaviors and support business workflows.

Zacco India R&D (May 2020 – April 2025)

Projects: IPview, Access Management, iZac, Integrations

- Led a team through resource planning, task allocation, and two weeks sprint execution to ensure timely project delivery.
- Gathered and analyzed business and technical requirements, executed effort estimations, and contributed to end-to-end full-stack development activities.
- Developed and maintained backend services using .NET Core and Web API, integrating with Azure services and SQL databases.
- Developed front-end solutions using React in SPFx, leveraging Fluent UI, SharePoint REST APIs, and integrated with .NET Web API to build interactive and dynamic web parts.
- Led stakeholder communication on project status, risks, and milestones through structured weekly updates.
- Reviewed codebase for adherence to standards, reducing post-deployment bugs by 30%.
- Designed and implemented CI/CD pipelines using Azure DevOps to automate build, testing, and deployment workflows.
- Evaluated new technologies through R&D and developed Proof-of-Concepts (POCs) for upcoming features.
- Applied technologies such as .NET Core, C#, Web API, Azure Services, SPFx, React, SQL Server, Entity Framework, LINQ, HTML, CSS, and Agile methodologies.

Wipro – Shell, Maxis, AMG (Jul 2016 - May 2020)

Projects: HSSE Event toolkit, Hiepsat and IM Portal, DEN, Megabite, iContract, DMS, Case Management System, Crystal, SRC

- Developed custom SharePoint solutions and integrations using ASP.NET, C#, Web API, JavaScript, CSS, SharePoint Designer Workflows, CSOM, and JSOM.
- Developed and deployed 10+ PowerApps applications to automate workflows and optimize business processes across multiple client engagements.
- Gathered and analyzed functional and technical requirements to deliver tailored solutions within defined timelines and scope.
- Designed, developed, and maintained SharePoint-based applications supporting diverse business workflows and client requirements.
- Served as the Single Point of Contact (SPOC) for SharePoint-related support, issue resolution, and technical guidance.
- Collaborated with product owners and business stakeholders to identify enhancement opportunities and implement new features and automation solutions.
- Automated administrative and operational tasks using PowerShell scripting, improving efficiency and reducing manual effort.
- Modernized legacy SharePoint customizations, lists, and libraries to ensure compatibility with the modern SharePoint.
- Delivered custom workflows, forms, and UI enhancements to improve usability and streamline business operations.
- Worked extensively with technologies including SharePoint 2016, SharePoint Online, REST APIs, SharePoint Search, CSOM, JSOM, C#, JavaScript, CSS, and Power Platform technologies.

EDUCATION

BITS Pilani, Rajasthan

M.Tech in Software Engineering - 76% (2019)

GGDSD College, Panjab University, Chandigarh

B.Sc in Information Technology - 62% (2015)

GMSSS – 46, Chandigarh

12th - 75% (2012)

GMSSS – 35, Chandigarh

10th - 82% (2010)
